

WEBI Connector for SAP Lumira

Accelerate the import of data into SAP Lumira stories to facilitate faster access to key data visualizations

A rapid response can make all the difference in critical business decisions. Building and implementing new mobile features for SAP Lumira can be time and resource intensive, as well as cost prohibitive for small and medium businesses to develop in-house.

Developed as an accelerator add on to the cloud-based HCP Data Visualization App for SAP Lumira, Charter Global's proprietary WEBI Connector offers innovative and enhanced capabilities to build visualizations on operational data. With its ability to read and convert existing WEBI reports into a Lumira story, the WEBI Connector accelerates the data import process and reduces the effort to map data points. The result is a simplified and more efficient process of creating important data visualizations with significantly greater speed and accuracy.

Charter Global drives innovation with SAPUI5 (SAP User Interface for HTML 5) mobile integration and app development. We are a trusted SAP partner that offers out-of-the-box integration with SAPUI5 mobile. Our multidisciplinary global team provides end-to-end solution implementation and support to ensure real-time transaction processing and enhanced data accuracy for your SAP HANA cloud platform.

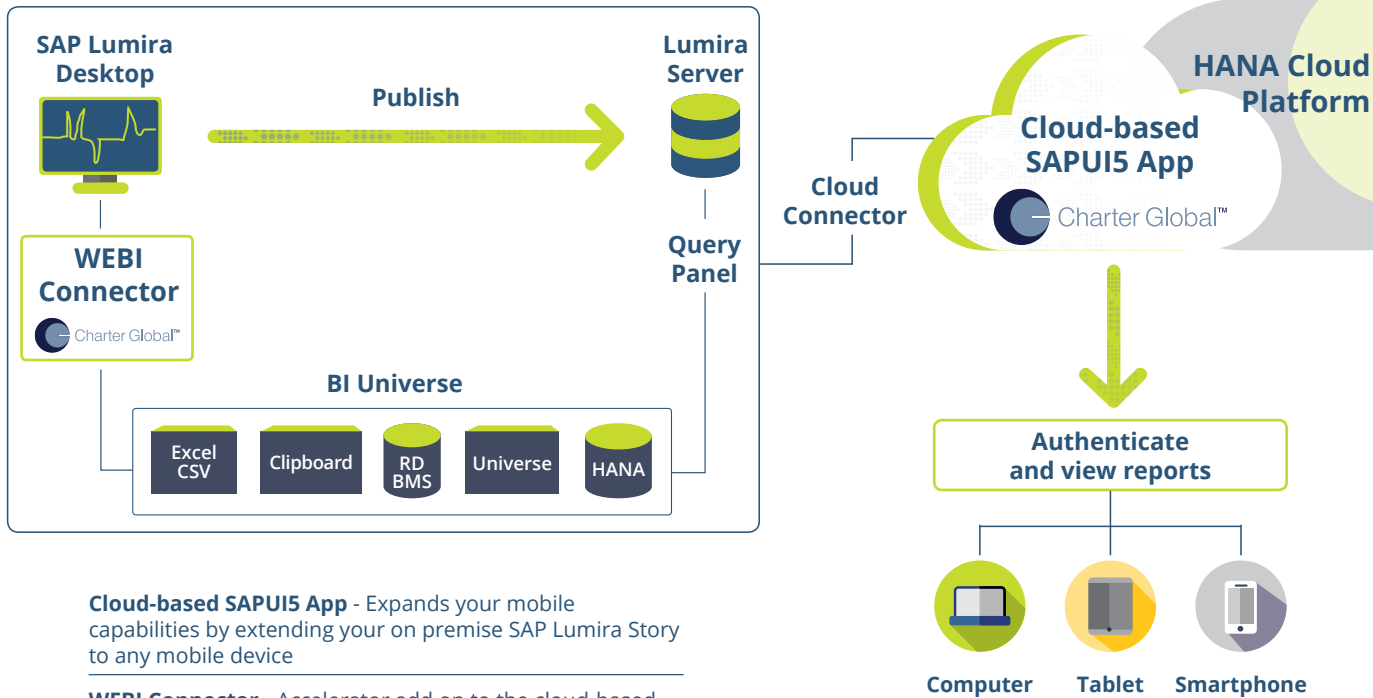

Solution Features and Enhancements

- Directly import data from WEBI reports for Lumira stories
- Effort to create cloud-based data mapping reports reduced 50%
- Faster SAP Lumira implementation
- Access Lumira stories from SAP HCP

* Can be customized on request
