Charter Global™
Strategy • Technology • Solutions

Company Profile
Maximizing the Potential of your IT Investment

Let's talk about your project needs and build a solution together

The Charter Global team of nearly 1000 IT professionals delivers end-to-end cloud technology and digital solutions, open source, mobile, ecommerce, & custom application development across multiple platforms. By leveraging the expertise of our highly skilled resources, our clients – Fortune 1000 companies including NCR, Allconnect, ADP, LexisNexis, AT&T - increase their efficiency with a more rapid ramp up, scalable resources, and shorter implementation timelines.

Strategy & Advisory Services

We offer a robust cloud strategy and advisory services tailored to your business objectives to help accelerate digital transformation with a hyper-focused approach. Our cloud consulting services include cloud vision, cloud value assessment, cloud roadmap & transformation plans.

We assess the maturity and readiness of your current application and infrastructure portfolio and align them with your core business objectives to design a viable way forward to the cloud. With our suitable technology selections, we can plot your journey to the desired end-state, while also examining the required capabilities matrix, organizational changes, and skills needed to derive maximum value from the cloud.

Digital-first Solutions

Our digital-first approach leverages emerging technology to help mid-sized businesses and enterprises achieve their objectives by focusing on helping them undertake digital transformation and maximize potential through technology. We work closely with all our clients through a shared commitment to excellence, integrity, and innovation while building dependable long-term relationships that withstand both evolving technology and business trends.

Our solutions streamline IT by synergizing business, development, and operation processes. We provide consulting and advisory services, configuration management, automated provisioning, continuous integration, automation, and monitoring. By embracing a well-suited DevOps approach, we improve deployment frequency, reduce failure rates, lower lead times, and accelerate time to recovery.

> " Charter Global has worked effectively with NCR's Software Engineering Center in delivering superior and creative solutions. With its consistent quality performance, they stand out from other vendors.

── Core Capabilities ──

About Charter Global

Founded in 1994 by Murli Reddy, Charter Global, Inc. has grown to be a team of nearly 1000 consulting professionals dedicated to mid-market business and enterprise success in the ever-evolving digital economy. Over the past 28 years, we have developed a portfolio of over 100 successful project implementations, refining proven methodologies that enable our professionals to deliver industry leading solutions.

Our client experience spans across a wide range of industries including pharma, manufacturing, telecom, finance, healthcare, media/entertainment, airline, energy, retail, and hospitality. Headquartered in Atlanta, GA with offices in the U.S, India, and Serbia, we are well-positioned to deliver on our commitments and help businesses transform in a rapidly changing world.

The Charter Global Value

Our proven process results in deploying solutions at an accelerated pace, a reasonable cost, and with significantly reduced risk. We ensure optimal use of the project team's time and resources by engaging our offshore team for custom development and testing, as well as post-production support.
