

Oracle JD Edwards - Employee Self Service App

Employee Self Service App engages and enables your employees to manage their personal and team information.

The Charter Global JD Edwards Employee Self-Service (ESS) App gives your workforce the ability to manage their own personal and team data on their mobile device. The app integrates with your JD Edwards backend ensuring secure and current data flow.

This innovative and interactive application represents advances in HR management technology developed to improve employee productivity and data integrity. It reduces administrative tasks and gives employees the ability to control their own information.

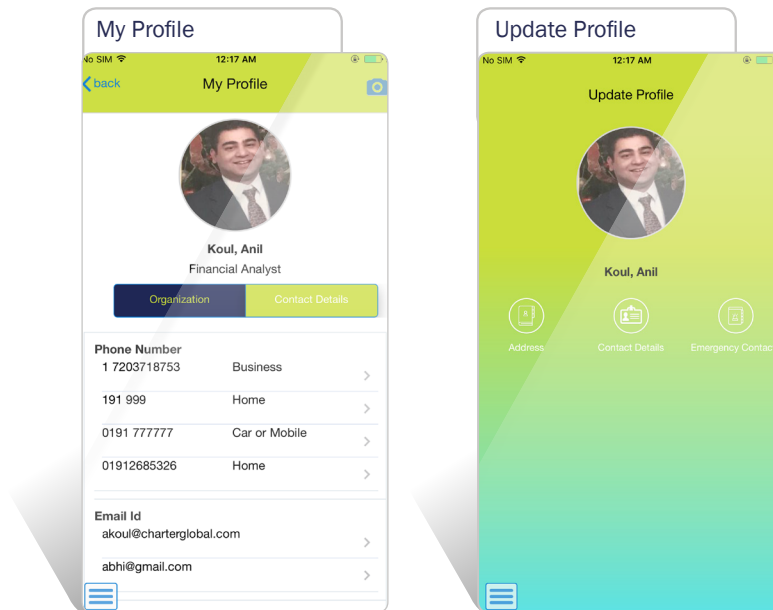

App Features & Benefits

- **Directory** – Access employee directory and employee contact information.
- **My Profile** – Access key employee personal information and key employee organizational information, and upload digital data.
- **Edit Profile** – View and update contacts, addresses, emergency contacts.
- **Organization Structure** – View organization hierarchy and drill down of reporting hierarchy with employee information.
- **Leave** – View leave history and accruals balance.

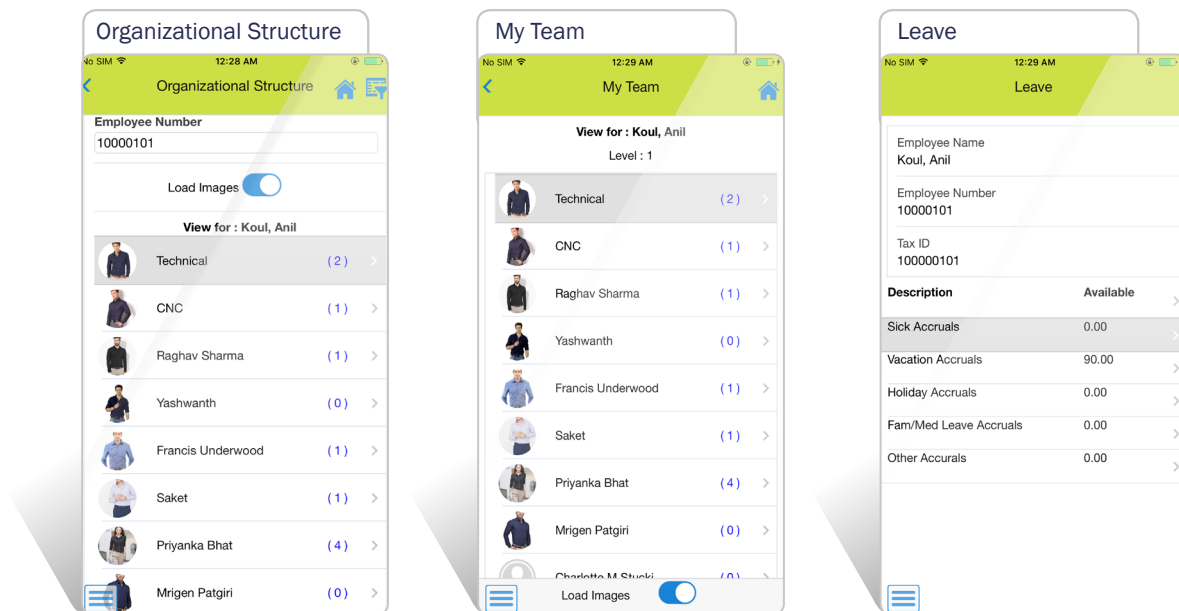

Go mobile with your JD Edwards SSE App.

With My Profile, employees can manage their profile information easily and quickly on their mobile devices.

My Team allows employees to view details of their reporting team members and reporting hierarchy.

Charter Global JD Edwards apps are pre-configured for a rapid implementation so you can go live in weeks rather than months.

Charter Global's JD Edwards experts leverage the Oracle MCS platform to transform and extend your Oracle enterprise processes to digital and mobile. Our Oracle Mobile Cloud Platform experts offer consulting, delivery, and implementation services.

- Oracle MCS provider – Hosting of apps
- Apps distributed using SAAS model
- Use existing JD Edwards business processes and tasks
- No need to create new JDE versions for programs and UBEs
- No need to add new JAS servers
