

Automation or Integration?

Companies who undergo merger and acquisition activities face the challenge of integrating diverse systems such as payroll, financial, customer and operations systems which may become redundant in the new organization. Charter Global simplifies this process with our Automation or Integration offering tailored to manage the complexities of post-M&A integrations and new LOB deployments.

Key Features of Aol

Streamlined Integration

Aol simplifies post-M&A integration of redundant LOB systems ensuring seamless data sharing and connectivity between incoming and incumbent applications.

Strategic Planning & Execution

We engage in a thorough analysis of business environments and requirements, strategic planning sessions and practical execution plans. We consider licensing, subscriptions, calendar dependencies and system life cycles to optimize transitions and maximize business benefits.

Collaborative Approach

We prioritize transparent communication and collaboration with all organizational stakeholders. We set up detailed project plans that maintain business continuity during the transition, ensuring minimal disruption to operations.

Aol Business Benefits

- **Minimize Disruption:** Mitigate post-M&A productivity impact through smooth transitions.
- **Efficiency in Resource Use:** Relieve the burden on IT staff by streamlining system integrations.
- **Staff Support:** Ease staff transitions onto new systems with minimal impact to ensure they adapt without significant impact.
- **Seamless Transition Management:** Expertly handle the complexities of integration, automation and the phasing out of redundant systems.
- **Continuous Operations:** Ensure uninterrupted business operations throughout the integration.

Our **Aol** offering streamlines integrations, starting with an Opportunity Assessment call for scope and priority setting. We engage in strategy sessions, system audits, business impact inventories, timeline scheduling, project scoping and meticulous execution, including data management, user offboarding, and sunsetting redundant LOB systems for efficiency.
