

Charter Global Hybris Pre-configured Ecommerce Solution (PCS)

Enhance your ecommerce platform with innovative features that improve performance and customer engagement.

For an ecommerce strategy to be successful, organizations must provide a secure, efficient, and engaging customer experience. Standard software packages often don't offer an effective user interface, which results in a frustrating online user experience. Enhancing capabilities for high-end solutions such as SAP Hybris can be resource and technology intensive, as well as cost prohibitive for small and medium businesses.

Charter Global's proprietary Hybris Pre-configured Ecommerce Solution delivers a rapid return on value while transforming your ecommerce strategy. It provides a robust user interface for your internal and external users at a fraction of the cost of an in-house solution. Our team has over 30 years of experience in B2B and wholesale markets in providing end-to-end support across the solution lifecycle.

"Thanks to Charter Global's untiring efforts, PPG successfully went live with its Hybris website and simultaneously retired its previous ecommerce solution. I commend the Charter Global development team for breathing life into this software."

- Philip Bauer, VP IT/Environmental Compliance, PPG

Simplify Data Loading with Charter Global Templates

Charter Global developed a series of standard Hybris templates, a best practice that reduces risk by ensuring the proper process is followed including cross checks between pre-load and post load. Templates reduce the effort required to manage data loads, as well as the project timeline and cost of implementation.
