

One Partner to Meet All Your OCI Lift and Shift Needs

Charter Global is the only partner to offer Fixed Fee services for migrating the client database into the Oracle Database Cloud Service environment.

- With over 20 years of experience in Oracle Databases and E-Business Suite, we've formed our service models based on our expertise. We use Oracle's OCI standards based approach for our client Lift and Shift solutions.
- Our service provides license optimization by moving to OCI, lowers TCO to sustain your environment, and increases system performance 2-4x meaning a shorter time to market, faster delivery, and performing more labor in less time.

Migrate Oracle E-Business Suite, JD Edwards, and Peoplesoft into an Oracle Cloud Infrastructure

- We will review current Oracle Cloud migration strategies, define a migration approach, and work with the client IT team to move the environment to the Oracle Cloud.
- The final product is to move Oracle E-Business Suite, JDE, and Peoplesoft database(s) and operating system to an Oracle Cloud PaaS/IaaS.
